LIST OF AUTHORS

	Page		Page
<i>Andersson, L.</i>		<i>Ivner, S.</i> (see Frank, H. & Ivner, S.)	
Rural electrification in developing countries	14	<i>Jönsson, K.</i>	
<i>Bartels, J. & Håkansson, K.</i>		MICAPACT® II coils for high-voltage rotating machines	27
Factory-assembled substations save time and eliminate complications	7	<i>Kelen, A.</i>	
<i>Björklund, A.</i> (see Virsberg, L.-G. & Björklund, A.)		Functional testing of MICAPACT® II insulation	36
<i>Bröms, A.</i>		<i>Larker, H. T.</i>	
No-break power supply	129	Hot isostatic pressing for the forming and production of ceramics	85
<i>Ericsson, H.</i>		<i>Lidberg, K.</i>	
Thyristor convertors for d.c. drives	109	Frequency convertors type YRRA for induction motor drives	115
<i>Flisberg, G. & Funke, B.</i>		<i>Lindbäck, L.-E.</i>	
The CU HVDC Transmission	59	Development trends in power electronics	107
<i>Frank, H. & Ivner, S.</i>		<i>Linderholm, S.</i>	
Thyristor-controlled shunt compensation in power networks	121	Capacitance-graded bushings with insulation of oil-impregnated paper	79
<i>Frank, K. & Rehnman, K.</i>		<i>Rehnman, K.</i> (see Frank, K. & Rehnman K.)	
Static frequency convertors for the auxiliary power supply on electric locomotives and multiple-unit trains	137	<i>Rothman, B.</i>	
<i>Funke, B.</i> (see Flisberg, G. & Funke, B.)		Manufacturing of MICAPACT® II coils	42
<i>Gahm, J.</i> (see Stenqvist, G. & Gahm, J.)		<i>Solheim, R.</i>	
<i>Håkansson, K.</i> (see Bartels, J. & Håkansson, K.)		Electrical distribution—the invisible giant	3
<i>Hedman, L.</i>		<i>Stenqvist, G. & Gahm, J.</i>	
Low-voltage fusegear and distribution pillars for three-phase systems	11	Aerial cables instead of overhead lines	22
<i>Hellman, O.</i>		<i>Thelin, C.</i>	
The diesel generator in rural electrification	18	Induction heating and hot shearing plant for billets at AB Bofors-Kilsta, Sweden	91
<i>Hellström, T.</i>		<i>Virsberg, L.-G. & Björklund, A.</i>	
Some milestones in the history of the squirrel-cage induction motor	51	Further development of MICAPACT® insulation	33

LIST OF CONTENTS

	Page		Page
<i>Research and development</i>		<i>Electronics and computers</i>	
Further development of MICAPACT® insulation	33	New PRESSDUCTOR® roll force measuring equipment *	76
Functional testing of MICAPACT® II insulation	36	ASEA automation equipment for a Czechoslovak basic oxygen steel plant project	97
<i>Manufacturing</i>		Development trends in power electronics	107
Manufacturing of MICAPACT® II coils	42	Thyristor convertors for d.c. drives	109
Isostatic pressing for the forming and production of ceramics	85	Frequency convertors type YRRA for induction motor drives	115
<i>Power and heat generation</i>		No-break power supply	129
Diesel generator in rural electrification	18	Static frequency convertors for the auxiliary power supply on electric locomotives and multiple-unit trains	137
Swedish contractors to build hydro power station in Peru *	68	Speed control saves energy *	143
ASEA to supply AFR facility for storage of spent nuclear fuel	68	ASEA's new d.c. drive system TYRAK® 8A in the packaging industry *	144
Another Swedish industrial turbine for Canada *	71	<i>Industrial robots</i>	
ASEA to supply hydro power generators to Sudan *	73	ASEA to open robot facility in the Detroit area *	68
Swedish large wind power station in the United States *	97	<i>Rotating machines</i>	
ASEA-ATOM to supply radioactive waste treatment plant at Oskarshamn 3 Nuclear Power Plant *	100	The diesel generator in rural electrification	18
Water pump for the ASEA Ludvika Works *	100	MICAPACT® II coils for high-voltage rotating machines	27
ASEA-ATOM concept lowers nuclear fuel costs *	103	Further development of MICAPACT® insulation	33
Break power supply	129	Functional testing of MICAPACT® II insulation	36
<i>Power transmission and distribution</i>		Manufacturing of MICAPACT® II coils	42
Electrical distribution—the invisible giant	3	Some milestones in the history of the squirrel-cage induction motor	51
Pre-assembled substations save time and eliminate complications	7	ASEA to supply hydro power generators to Sudan *	73
High-voltage fusegear and distribution pillars for three-phase systems	11	Electric motors for cash registers and advanced optical readers *	74
Rural electrification in developing countries	14	Häggblunds receives major U.S. order for hydraulic motors for jack-up rigs *	102
Underground cables instead of overhead lines	22	700 alarm units with type MT motors *	104
Delivery of distribution substations to Dubai *	24	Speed control saves energy *	143
100 kV HVDC Transmission	59	<i>Transportation and materials handling</i>	
Electricité de France purchases busbar differential protection *	72	Saving fuel on board ship *	48
Grated distribution substations *	73	ASEA electrics at South Blackwater Coal Mine, Australia *	70
Commissioning of the Gotland HVDC link *	99	All-terrain carrier with extremely high mobility *	75
Static VAR compensator in Canada *	101	Arctic climate deck cranes *	98
Advanced ASEA voltage control system operating at AEP substation *	103	Häggblunds extends its deck crane programme *	99
Motor-controlled shunt compensation in power networks	121	HÄGGLOADER 10HR—a new, trackless loader *	100
Operating successes for ASEA's static VAR system *	144	Double-drum hoist with disc brakes for Canada *	101
<i>Transformers and shunt reactors</i>		New major order for electric multiple-unit trains for Brisbane *	102
Shunt reactors ordered by Canadian and U.S. utilities *	71	Static frequency convertors for the auxiliary power supply on electric locomotives and multiple-unit trains	137
Canada buys three more 100-Mvar shunt reactors, totalling similar units ordered from ASEA *	71	<i>Miscellaneous</i>	
Capacitance-graded bushings with insulation of oil-impregnated paper	79	ASEA to open robot facility in the Detroit area *	68
<i>Metallurgical industries</i>		Reprints from ASEA Journal *	76
ASEA-SKF furnaces for Europe and Latin America *	47		
ASEA to supply large induction heater to Bofors *	47		
Electric arc heating and hot shearing plant for billets at Bofors-Kilsta, Sweden	91		
ASEA automation equipment for a Czechoslovak basic oxygen steel plant project *	97		
<i>Process industries</i>			
Commissioning of Yering Gorge Pumping Station, Victoria, Australia *	69		
New PRESSDUCTOR® roll force measuring equipment *	76		
Isostatic pressing for the forming and production of ceramics	85		
New home of "Pink Batts"	101		
Häggblunds receives major U.S. order for hydraulic motors for jack-up rigs *	102		
ASEA's new d.c. drive system TYRAK® 8A in the packaging industry *	144		

* News in brief
